

## **Student Research Assistant (f/m/d)**

**Stellenanbieter:** Leibniz-Zentrum für Agrarlandschaftsforschung (ZALF) e.V.

The mission of the Leibniz Centre for Agricultural Landscape Research (ZALF) as a nationally and internationally active research institute is to deliver solutions for an ecologically, economically and socially sustainable agriculture – together with society. ZALF is a member of the Leibniz Association and is located in Müncheberg (approx. 35 minutes by regional train from Berlin-Lichtenberg). It also maintains a research station with further locations in Dedelow and Paulinenaue.

The working group Sustainable Land Use in Developing Countries (SusLAND) focuses on the analysis of land use and landscape systems in emerging and developing countries. Based on the analyses, interdisciplinary research methods are used to develop strategies to mitigate complex problems of farming systems in developing countries at local, regional and global scales. Emphasis is placed on questions regarding the avoidance of land use conflicts, the improved adaptation to climate change, food and nutrition security, and the stabilization of the livelihood of family farms. The GIZ project Peat4People addresses the urgent need to restore Rwanda's peatlands. It brings together scientific partners, policy institutions, cooperatives, private-sector actors, and women's and youth groups to co-design viable paludiculture-based value chains, market and financing models and inclusive governance structures that can support sustainable peatland management and climate-resilient development in Rwanda.

We are offering temporary 20h/month position limited until 30.09.2027 at our location in Müncheberg as

### **Student Research Assistant (f/m/d) 74-2025**
