IT Security Engineer (gn) Climate Action

Stellenanbieter: ClimatePartner GmbH

Beschreibung:

Intro

ClimatePartner is a leading solution provider for corporate climate action: We combine individual consulting with a cloud-based software that is unique on the market. We help our customers calculate and reduce carbon emissions and offset residual emissions. This renders products and companies carbon neutral, confirmed by our label.

We offer carbon offset projects in different regions and with different technologies and standards. The additional social benefits of the projects are particularly important to us. Our efforts are geared towards the 17 Sustainable Development Goals (SDGs) of the United Nations.

ClimatePartner was founded in Munich in 2006. Today, our more than 500 employees are spread across offices in Barcelona, Berlin, Boston, Essen, Frankfurt, London, Milan, Munich (HQ), Paris, Stockholm, The Hague, Vienna and Zurich. We work with more than 5,000 companies in 60+ countries.

Aufgaben

What you will do

We strive to improve lives – today and tomorrow.

Climate change is one of the greatest challenges humanity has ever faced. For global warming to remain below 1.5°C, the United Nations have set a clear goal: zero emissions (climate neutrality) until 2050.

To achieve this, we all need to change our behaviour rapidly. We help both, companies and individuals to calculate and reduce their carbon footprint and offset unavoidable emissions. Thus, we enable them to become climate neutral and make their contribution to reach the 1.5°C target.

By doing this, we direct funds towards the United Nations’ Sustainable Development Goals (SDGs) and support people and wildlife in developing countries.

Our Corporate IT department aims to
• Provide top notch and secure technology to all our employees and maintain it properly,
• Professionally and proactively help our employees with everything they need to do their job,
• Continuously seek standardization, optimization and automation in our processes and IT components.

How We Work

The Corporate IT team is growing rapidly. By joining the team you will get the chance to strongly influence how we work, which technologies we offer and how successful we can be in supporting our internal customers to do their best. We aim at a modern and very friendly way to collaborate in case of customer requests or incidents. Agile methods are applied to all projects with Corporate IT involvement.

Within Corporate IT team we work closely together to make sure that precious know-how is exchanged all the time. We try to fail fast and learn, improve and continuously deliver value to our internal customers. Predictability and reliability are highly important to us as well.

We currently support

• Windows laptops and MacBooks
• 100% SaaS solutions, especially Microsoft 365 and Microsoft Azure
• Collaboration tools like Jira, Confluence and SharePoint
• Video conferencing, printing and all other necessary IT office infrastructure

We work in co-located teams but also enable remote work. We are idealists concerning our purpose, pragmatists with regards to getting stuff done and colleagues when it comes to reaching common goals or having an afterwork beer. We value everyone’s life outside of work and go at a sustainable pace.
