Energy Markets Analyst (m/f/d) in Renewable Energies

📍 Encavis AG (Hamburg) 🏢 Permanent ⌚ Full-time

50% Mobile Office possible

What do we rely on at ENCAVIS? The sun. The wind. And on you.

Welcome to the world of Encavis! At Encavis, everything revolves around the power of the sun, the wind and the more than 200 people who together are helping to shape the energy system of the future. What exactly do we do? We make renewable energy economically viable. Our core business is the acquisition and operation of solar and wind parks throughout Europe. Already today, we are one of the leading group-independent electricity producers in the field of renewable energies. And we are continuing to grow. What does that mean for you? The opportunity to move, shape and change a lot. As part of a multinational team that enjoys helping the energy transition to succeed.

There are many reasons why you should join Encavis - but your expertise and experience speak for themselves! What can you expect from us? You will quickly take on a key role in supporting the development of Energy Portfolio Management at Encavis AG.

Your sunny outlook:

Reporting

- Building a position reporting system and revenue tracking
- Further developing existing software projects in collaboration with development partners and the IT team to optimally digitize portfolio management

Hedging strategy

- Actively participating in the development of new hedging strategies by running stochastic models or backtestings
- Tracking of short-term hedging strategies
- Continuously following price developments and fundamental drivers of the energy markets

Risk assessments

- Quantifying market-, portfolio and delivery structure risks and their impact for PPA structures
- Develop PPA pricing models

Diese Seite nutzt Cookies, um bestmögliche Funktionalität bieten zu können.

- Quantifying the impact and economic advantages of other financial hedging instruments, such as options and battery tollings

We'll get wind of that soon:

- Academic degree in natural sciences, economics, statistics or equivalent
- Passionate about the energy transition and renewables and ideally already >1 year of work experience (practical experience in Origination/Trading/Risk Management departments is a plus)
- Confident in extracting and manipulating data from various sources, including APIs, CSV files, and databases, with a strong knowledge of SQL, R, and Python. Proficient in data visualization using Power BI and packages such as ggplot2, plotly, matplotlib, and seaborn. An excellent knowledge of Excel, including Power Query, is a plus
- Experience in hands on reporting of renewables revenues/controlling
- Experience in statistical analysis and application of stochastic and fundamental models to derive conclusions on risk/return metrics. In particular, know-how in the areas of meteorological and/or commodity market data is an advantage
- Experience in pricing modelling in financial/energy markets
- You are a team player and enjoy working independently, diligently, and responsibly
- Good communication skills in German and English complete your profile
