

SENIOR MANAGER SUSTAINABILITY PROGRAM MANAGEMENT (F/M/D)

AUFGABEN

- Position TÜV SÜD as a sustainability thought leader by building a strong internal organization and driving visibility through the Sustainability PMO
- Strengthen market leadership by shaping the global sustainability services portfolio with a focus on climate action certification or energy infrastructure, and executing effective go-to-market strategies
- Deliver cross-business and cross-regional initiatives on time and within budget by managing resources, governance, and stakeholder alignment
- Ensure operational excellence through robust processes and governance structures that embed sustainability into the business
- Build impactful collaboration platforms and networks, ensuring alignment, accountability, and measurable outcomes across divisions and regions
- Inspire and align senior leadership and project teams to achieve ambitious sustainability goals and service standards
- Enhance competitiveness by anticipating regulatory changes, leveraging market insights, and securing lighthouse projects

QUALIFIKATIONEN

- University degree (Bachelor's/Master's) in management, finance, environmental science, or engineering
- 5+ years of project experience in sustainability services, ideally in climate action and certification (e.g., energy audits)
- Several years in strategy or sustainability consulting at client-facing level
- Proven business development skills, including go-to-market strategies and P&L responsibility
- In-depth knowledge of sustainability regulations (e.g., CSRD, CBAM) and hands-on implementation experience
- Strong project management, analytical, and conceptual skills; proficient in PowerPoint, Excel, and data handling
- Excellent communication (German/English), interpersonal, storytelling, and leadership skills to guide international teams
