Project Manager (m/f/d) for Thermal Energy

Stellenanbieter: Lahmeyer International GmbH

Dornier becomes Lahmeyer: Going forward, Dornier and Lahmeyer will conduct their energy-related activities under the joint **Lahmeyer International** brand. In doing so, we are uniting our many years of experience, our technical expertise, and our consulting capabilities under a single name.

Above all, this step means one thing: **more expertise from a single source**. Together, we offer an even broader range of engineering and consulting services in the business units of **Power & Heat, Transmission & Distribution, Renewables,** and **Hydro**.

Lahmeyer International thus stands for innovative projects and exciting challenges and is a competent and reliable partner for complex consulting projects and sophisticated engineering services in both national and international contexts.

To continue our growth, we’re looking for you to join our team in our business unit **Power & Heat** at the location **Bad Vilbel, Germany or at project offices worldwide** as soon as possible as a qualified and dedicated

Project Manager (m/f/d) for Thermal Energy

What you can achieve with us:

- In your role as a project manager in our Gas-to-X department, you independently manage projects in the fields of thermal energy across all phases of the project lifecycle – from initiation through execution to closure
- In support of sales activities, you contribute to proposal preparation and tender processes
- You develop project plans, timelines and resource allocation strategies, while steering budgets to ensure financial targets
- You serve as the primary point of contact for clients, partners, and internal teams
- Identifying risks and implementing mitigation strategies is in your hands
- You ensure compliance with technical standards, contractual obligations, and safety regulations
- Regular progress reports are prepared by you for management and clients
- You lead and motivate multidisciplinary teams, including engineers and consultants, to achieve the defined project objectives

What convinces us:

- You have a degree in Mechanical, Electrical or Energy Engineering, Instrumentation and Control Engineering, Project Management, or related fields
- You have at least 5 years of experience in project management within energy,

infrastructure, or water sectors. Familiarity with renewable energy integration and decarbonization strategies will be considered an asset
- You have demonstrated success in leading and delivering international projects within the thermal power plant sector
- Knowledge of FIDIC contracts and international standards and proficiency in project management tools (MS Project etc.) complements your professional profile
- A project management certification is a plus
- You are a strategic thinker with problem-solving skills
- You display a high level of integrity and client focus in multicultural settings, with strong communication and leadership competencies
- You are willing to travel both domestically and internationally as required
- You speak fluently English, German is an advantage

What we have to offer:

- 30 days of holiday – Christmas Eve and New Year's Eve are also days off
- Subsidy for ‘eurekantine’ – so you can get through the working day feeling fresh and well-fed
- JobRad leasing – get to your destination on your dream bike
- Employee and refer-a-friend bonus – we share our success with you
- We support your personal and professional development
- Company-wide summer party & local Christmas parties
- Together we stand for our values – reliability, open communication, trust, health, and genuine appreciation

Contact:

As an international company, we value diversity and welcome applicants regardless of age, gender, sexual identity, physical or mental abilities, cultural, social, or ethnic background, religion, or worldview.

We look forward to receiving your application as Project Manager (m/f/d) for Thermal Energy!
