

## Earlier Career Researcher - Agroecological Systems (f/m/d) - part-time position

**Stellenanbieter:** Leibniz-Zentrum für Agrarlandschaftsforschung (ZALF) e.V.

The mission of the Leibniz Centre for Agricultural Landscape Research (ZALF) as a nationally and internationally active research institute is to deliver solutions for an ecologically, economically and socially sustainable agriculture – together with society. ZALF is a member of the Leibniz Association and is located in Müncheberg (approx. 35 minutes by regional train from Berlin-Lichtenberg). The institute maintains further locations in Brandenburg (Dedelow, Paulinenaue) as well as in Hesse (Giessen, Witzenhausen, and Geisenheim).

The research group “Farm Economics and Ecosystem Services” is a team of dedicated senior and early career scientists who want to make a difference through good science, mutual support and exchange with other disciplines and practitioners. We offer a position within the EU-Agroecology Partnership project Agri-TASC (funded by BMFTR): In the project, we aim to assess the ecological, social and economic benefits of agroecology, test solutions in European Living Labs, and improve tools for evaluating alternative farming methods.

We offer a temporary part-time position (65% of regular weekly working hours) at our location in Müncheberg subject to funding for 36 months with the earliest starting date in August 2026 as:

### Earlier Career Researcher - Agroecological Systems (f/m/d)

**25-2026**

#### Your tasks:

- Socio-economic assessment of agroecological systems (Development, adaptation and application of assessment models to analyse the economic and social impacts of agroecological practices)
- Scenario development and policy analysis (development of evidence-based future scenarios and policy recommendations for agroecological transformation)
- Interdisciplinary work with farmers and other project partners in six living labs across Europe on improving practical and institutional changes in the agricultural systems

#### Your qualifications:

- a completed master's degree in agricultural economics, environmental economics, or a related field
- a good understanding of European farming systems
