Senior Consultant – Water/Wastewater Engineer

Stellenanbieter: MACS Energy & Water

Beschreibung: Consulting inspired by innovation

MACS Energy & Water is an independent consulting firm active in the field of infrastructure finance. We focus on the changing realities in the Water and Energy sectors. Our vision and approach is based on the holistic thinking, which is needed to get sustainable water and energy projects off the ground. Our regional experience primarily covers Central and South East Europe, Latin America, the Middle East, and East Africa. For upcoming assignments in Latin America, we are currently seeking

Senior Consultant – Water/Wastewater Engineer

We wish to engage an experienced engineer for the global development of our international water and sanitation department. The position is based in Latin America, with regular travelling for short- and mid-term assignments to lead our expert teams in current and future projects.

The activities of our water department are focused in Latin America and the Caucasus regions. In the framework of our holistic consulting approach, you work at the interface of engineering, finance, and policy advisory as you will be able to design, tender, and supervise projects. At the same time, you will be an advisor to regional governments, water and sanitation utilities, municipalities or other service providers. For that, a well-founded understanding of the different aspects of sustainability of water and sanitation systems is essential.

The position covers the following working areas:

- Assessment of various designs and supervision of the implementation of centralized water and wastewater networks as well as decentralized sanitation facilities.
- Participation in Concept-, Pre- and Feasibility Studies, Market Studies, Technical Assessment Studies.
- Participation in and coordination of project implementations as Team Leader.
- Advisory services to financial agencies, governments, and municipalities, as well as other key stakeholders.
- Advisory services to utility managements, with a focus on optimized management structures and processes, and the training of interdisciplinary and technical O&M staff.
- Participation in project acquisition activities.
- Other upcoming services in the field of expertise.

Requirements:

- Engineering university degree preferable civil, sanitary or mechanical engineering with specific knowledge of urban and rural water and wastewater systems. Post graduate qualifications would be considered as an asset.
• Min. of 10 years of relevant professional experience, including team leader
• Excellent language and communication skills in both English and Spanish - both written and spoken - are essential. Additional knowledge of Portuguese is an asset
• Team player with a creative and enthusiastic personality
• Flexibility to travel on short notice
• Flexibility for medium-long term assignments

Rewards:

• Competitive remuneration
• Interdisciplinary and international expert teams
• Space and time to develop and contribute with innovative ideas and concepts
• The opportunity to develop our Water & Sanitation department and project portfolio
• Exciting and challenging perspectives
• Collaboration with well-known international clients and partners

If this opportunity has peaked your interest and you feel qualified to apply for this exciting position, send us a cover letter and your CV, in English, and other relevant references to staffing@macsonline.de. For more information on MACS Energy & Water, please visit www.macsonline.de
