

# Full Stack Developer (d/w/m)

**Stellenanbieter:** carbonfuture GmbH

## **Beschreibung:**

### **About Carbonfuture**

You are a professional in your field and want to make a real contribution to climate protection in an innovative startup?

We decided to invest in making a massive handprint of positive change: Our mission is to empower people and organizations to mitigate the climate crisis by removing CO<sub>2</sub> from the atmosphere. Carbon removal is needed at large scale in addition to massive emission reductions. Next to carbon forestry and the build-up of soil organic carbon, biochar is one of the readily available and scalable carbon-sink solutions.

We are a startup company based in Freiburg and California operating a blockchain-based carbon-sink accounting and trading platform with a primary focus on biochar. We are working in close collaboration with biochar producers, users, independent certifiers, scientists, associations, climate consultancies and customers.

We are looking for a full stack developer to join our team and help to significantly shape our platform – the high-tech foundation of our business model.

### **What is in store for you**

- You will work on the further development of the carbonfuture platform – including front-end and back-end, architecture and UX – and ensure its operation.
- You will work closely with our CTO as well as with external partners.

### **Anforderung:**

#### **What you bring to the table**

- Environmental and climate protection are close to your heart.
- A high degree of autonomy, independence, and intrinsic motivation.
- Detail-orientation with a creative approach to engineering.
- You have very good German and English skills.
- Ability to learn and adapt quickly.
- Knowledge of Java, Spring Boot, React, Docker, Gradle, Git.
- Ideally, you also have a relevant university degree (e.g. Computer Science, Software Engineering), knowledge of blockchain technologies (e.g. Hyperledger, Ethereum) and experience in agile software development.

#### **What we offer**

- A challenging and meaningful role in an innovative and fast-growing ecopreneur.

**greenjobs.de**

Die Jobbörse für Umweltfachkräfte

- A small but rapidly growing, internationally operating team that is passionate about having an impact on climate change.
- We care about the optimal way to solve a problem and nurture a culture of creativity and collaboration.
- Flexible working hours and the opportunity to work from remote or in our great office in downtown Freiburg.
- A courageous, undogmatic and fair work environment.
- It's an exciting time to be in this rapidly emerging market, where we have the opportunity to become a leading provider of solutions to climate change globally.

Join us!

**Start** as soon as possible  
**Place of work** Freiburg, working from a remote location is an option  
**Scope of work** full-time preferred
